

passport decking

Want a decking board that is as easy as the Australian outdoor lifestyle?

At CMA, we provide a suite of exterior systems in a range of materials, finishes and colours to transform any space into a stylish and modern low maintenance area. Gossen's Passport Decking will transform your home and allow you the time to enjoy it.

The alternative, cellular PVC deck board looks like real exotic hard wood without the cost and maintenance. It combines style, function and ease — and in the true sense of the words is totally, easily modern.

Try Gossen's Passport Decking today. It's...

Easy to use — light weight, available in four colours and two different widths, comes grooved for hidden fasteners, non-grooved for classic look or fascia plus the unique tongue and groove (No gap) deck board.

Stylish — its wood grain surface, uniform quality (uses no fillers), and its consistent and stunning finish adds to any space with amazing results... a blend of beauty and performance.

Flexible — a wood-like finish with bonus colour will create or suit almost any look, particularly with its multi-coloured shadings.

Easy to care for — don't worry about spills, stains, mould and mildew — a simple wipe and a quick rinse will keep it looking like new. It is exceptionally stain-resistant.

Long-lasting — with built-in UV protection, durable pigments and solid core cellular PVC, it retains its colour and is durable and strong in full sun, all temperatures and weather conditions. This eliminates the worry of splitting, cupping and warping. What's even better, it will be left alone by termites and other wood-loving insects.

Safe — in wet and dry conditions with its textured surface Passport Decking is Australian slip test compliant.

A healthy, sustainable living option with less chemical and material waste, a 25 year warranty, a high fire rating and no impacts on our forests. Gossen's Passport Decking originates from more than 80 years experience and is now offered with CMA's local knowledge, service and support.

Easy to install

CMA offers products that are easy to install and care for and Gossen's Passport Decking is no different.

The decking boards can be installed using the tongue and groove system or with hidden deck fasteners using the grooved boards. You will be able to lay, align and affix the boards in no time providing a tight, uniform and even finish.

CMA also offers un-grooved boards for fascia finish's or classical direct fastening.

Detailed, easy to follow, step-by-step instructions for each are available online at compositematerials.com.au

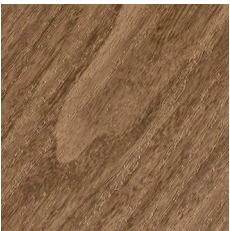

Please note that while care is taken to depict product colours accurately, colours may vary from those shown due to variations in lighting and printing/web techniques.

Select from four different colours

Ensure aesthetic harmony with surrounding structures and environment. Gossen's Passport Decking offers a selection of colour options to complement a vast array of settings.

London Grey

Spanish Walnut
